

## AIDS Protocol Using MMS1

**This is from Jim Humble's 2016 [book](#) on page 35:**

*"In 2009, I went to Malawi, a small country in southeast Africa. While there, 800 HIV/AIDS cases came to me. These people took only 3 drops of MMS1 every hour, for eight hours a day, for three weeks. Guess what? The 3-drop doses, taken eight hours a day for 21 days, were 99% effective in eradicating HIV/AIDS. There were only five failures out of the 800 cases, and of these five, instructions were not properly followed in one way or another."*

**On page 115:**

*"HIV/AIDS: Begin with the Starting Procedure and continue following the HRP (always observing the Three Golden Rules) until well."*
